

# WE CARE

COMPASSION

ACCOUNTABILITY

RESEARCH

EDUCATION

The foundation of our nursing philosophy is how we care for others. Our patient-and family-centered care is holistic and respects both human rights and the unique needs of the individual. Each of us demonstrates a strong commitment to professional development, **education**, organizational success, and improving the health of our community. Our commitment to quality care is seen through the organizational values of excellence, integrity, diversity, service, **compassion** and competency. **Accountability**, collaboration, empowering leadership, well manage change, and the use of evidence-based **research** is vital for the provision of quality, safe care.
